

VFM1
Power Tower

VETi

The Vetí Flush Mount Power Tower is the ideal solution for a compact design combination of sockets, Type-A and Type-C USB charging outlets which sit flush to the surface of any counter. When installed there is a slight protrusion of 2mm above the flat surface to ensure the sockets are accessible yet flush to the table. The compact height means they can be installed in tight spaces and there is very limited interference under the counter once installed.
