Microwave Sensors

The MS362 automatically turns on lights or any electrical device within the sensors rated load. It detects through obstacles like doors, glass panels, and thin walls, with a 360° detection range when mounted on a ceiling and 180° when wall mounted, and adjustable settings for time, Lux level and sensitivity. Easily integrated into new or existing installations, it excels in detecting subtle movements over large areas compared to PIR sensors. With an IP54 rating, the sensor is intended for indoor or outdoor installations. Installation must be done by a qualified electrician.
